About Kiki

Kiki underwent 2 open heart surgeries in her first week of life.

A fragile and weak baby, Kiki spent the beginning of her life in the NICU - Neonatal Intensive Care Unit.

Kiki entered foster care by the end of her first year of life.

At the age of 3, Kiki was adopted and left foster care. She was non-verbal, fed through a stomach tube, underweight and on medication for high blood pressure and heart disease.

On her 4th birthday, still non-verbal, Kiki experienced her first fully attended birthday party.

At the end of the day, as she sat on the family bed and gently touched her many presents, Kiki spoke her first complete sentence to herself - a very precisely articulated "Happy Birthday".

Today, Kiki is a very verbal and robust 25 year old "little girl". She was eventually diagnosed with a condition called 22q.11.2 deletion or "DeGeorge Syndrome". Kiki has and will forever have a submicroscopic piece of the 22nd chromosome missing.

Because of Kiki's mental challenges, she is unable to function in a typical work environment with so many distractions. However, she and her daddy have developed a wonderful working relationship and she enjoys working everyday with Dad.

Kiki's Logistix is dedicated to a little waif of a girl who has come a long way in life and is joyful to continue that success.
